

Help Shape the Future of Pharmacy

To date, more than 300 independent pharmacies have enrolled more than 3,200 patients in the Asthma Intervention Program, a national pilot program that provides independent pharmacists the opportunity to identify and help improve adult patients with uncontrolled asthma and earn compensation for their services. **More than \$88,000 has been earned by participating pharmacies since the program launched on March 15!**

A lot of people are focusing their interest on the outcome of this program. Many are asking themselves:

- Can pharmacists successfully enroll patients in research studies?
- Can they document and provide support for their role as providers of valuable patient care services?
- Are pharmacists ready to step out from behind the counter and prove they are providers of a service instead of just suppliers of a product?

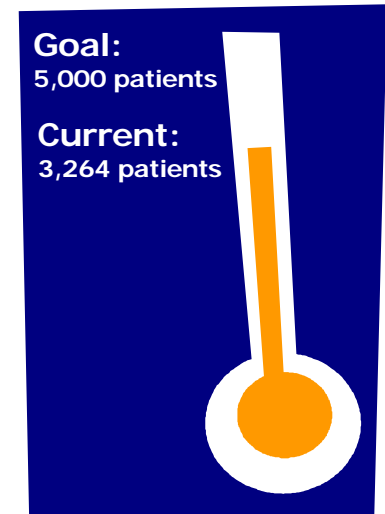

You can make a difference!

Your participation in this program helps us get one step closer to proving pharmacy is ready for this paradigm shift. Don't miss this chance to help shape the future of your profession!

Register and start enrolling patients today! No patient minimum required to participate!
Every patient counts!

Program Stats (as of 7/16/06)

Patients Enrolled: 3,264
Patient Goal: 5,000

Yes! I would like to participate in the Asthma Intervention Program. Please call me at the number below to guide me through the online registration process for this program. I understand this is an online program and that I will be registering for the program and performing data entry from the pharmacy computer. **Please fax this form to (703) 683-3619.**

Your Name

Your Pharmacy Name

Pharmacy Phone

Your E-mail (required for participation in the program)
