Reporting Potential Cases

If you are concerned that a patient may have COVID-19, contact your local or state health department immediately for consultation and guidance. If you do not have a city or county health authority, report it to your state health department. Following are links to directories of both local and state health authorities for all 50 states and U.S. territories.

Resources & Important Information

It is important that you monitor the government health authorities who are coordinating the state and local response to the virus outbreak in your area, most especially your state health department. These authorities will have vital information about the availability and location of screening/test kits/facilities, declarations of emergency conditions, emergency health-care or dispensing guidelines, and lockdowns.

Impact on AmerisourceBergen Inventory & Deliveries

Our wholesale partner reports no supply disruptions to date that are due to the COVID-19 outbreak. ABC's product sourcing teams are monitoring ordering activity and inventory levels and are placing allocations on products as needed. American Pharmacies is not aware of any disruptions or delays in product deliveries to pharmacies due to the COVID-19 outbreak, but we will closely monitor the situation, as deliveries could be affected if the outbreak seriously worsens.
